The studio is located in San Benedetto del Tronto (Italy) and it's hosted by Davide Ciotti, sound technician and ProTools certificated user. The Mastering is the core service of the studio made with the best HD digital signal processors in the audio market, using the TDM Technology developed by Digidesign®. TDM guarantee high definition, power and stability in every workflow made with ProTools HD, integrating third parts HD TDM plug ins from the better and most famous brands of the audio market such as TC Electronic®, Waves®, Solid State Logic®, Oxford, rndigitallabs®, EMI, Focusrite®, Sonnox Oxford and many others. Also the studio offers other kind of services as Mixing, Editing and Productions from the Remix to the advertising gingle, this latter made in another Audiolab's studio located in milan and run by Valerio Bianchini (Producer and Live Performer). By the years Audiolab collected a worldwide range of clients as labels and producers from every part of the world and guarantee everytime the work finalization in 24/48 hours with fast delivery using the FTP (File Transfer Protocol) delivery method.
